PROFILE

PEMCO Supplies Middle East was established in 2004 in order to provide innovative solutions to the oil, gas and water production industries. Our core business is the supply of casing, tubing, line pipe, drill pipe and related accessory products. Through our established international network of manufacturing, storage, inspection and repair facilities, along with our experienced customer focused team, we are able to provide a first class service to all of our customers.

We operate an auditable Quality Management System in accordance with ISO 9001. All of our technical and commercial operations are subject to the provisions of this progressive quality system.

We supply only new, unused, fully certified tubulars with full traceability back to the original certification of the manufacturer. All new manufactured material is supplied with full manufacturing surveillance undertaken by internationally recognised third party inspection companies.

We provide pipe management, inspection and repair services in the key oilfield distribution centers, notably Houston, Rotterdam, Dubai and Singapore. Our core business is supported by strategic alliances with specialist suppliers of products such as tubular lining systems, CRA alloys, cementing jewelry, perforated tubing, slotted tubing and well screen products.

PRODUCTS

We offer a comprehensive range of tubular products from stock and new mill production.
A summary of the products on offer is as follows:

CASING

- Full range of seamless casing in API standard diameters (4 ½" to 24"), grades (H40 to Q125) and connections (LTC, BTC).
- Full range of welded ERW and SAW casing, PEMCO is able to supply welded casing with API or "Quick" connectors.
- Full range of proprietary seamless casing, outwith the API range:
 - Dimensions, i.e. 9 7/8" 62.8 lb/ft, 13 5/8" 88.2 lb/ft.
 - Steel grades, i.e. CRA, high collapse, sour service steel grades.
 - Internationally recognised proprietary premium connections including threaded and coupled, flush and semi flush.
- All of our casing is manufactured in accordance with API 5CT by API accredited mills. Casing can also be manufactured to additional customer specifications upon request.

PRODUCTS

TUBING

- Full range of seamless tubing in API standard diameters (2 3/8" to 4 1/2"), grades (H40 to Q125) and connections (NUE, EUE).
- Full range of proprietary seamless tubing, outwith the API range:
 - Dimensions.
Steel grades, i.e. CRA, high collapse, sour service steel grades.
 - Internationally recognised proprietary premium connections including threaded and coupled, flush and semi flush.
- Lined tubing, for specialised applications such as corrosion resistance, sucker rod wear, etc.
- All of our tubing is manufactured in accordance with API 5CT by API accredited mills. Tubing can also be manufactured to additional customer specifications upon request.

DRILL PIPE

- Full range of drill pipes in API standard diameters (2 3/8" up to 6 5/8"), steel grades (E75 up to S135) and tool joints (NC26 up to 6 5/8" FH).
- Wide range of proprietary grades and tool joints, i.e. high strength, sour service.
- Wide range of proprietary connections.
- Drill pipes can be supplied with hard banding and internal coating.
- All of our drill pipes are manufactured in accordance with API 5D and specification 7 by API accredited mills. Drill pipes can also be manufactured to additional customer specifications upon request.

LINE PIPE

- Full range of seamless line pipes from 1/2" to 24" OD.
- Full range of welded line pipes in accordance with API 5L, ASTM.
- Submerged Arc Welded (SAW), OD range from 16" to 72", grades API 5L B through to X80.
- Electric Resistance Welded (ERW), OD range from 4" to 24", grades API 5L B through to X80.
- Wide range of proprietary grades, i.e. low temp, sour service.
- Wide range of internal and external coatings, i.e. FBE, 3 layer polyethylene.
- All of our line pipes are manufactured in accordance with API 5L by API accredited mills. Line pipes can also be manufactured to additional customer specifications upon request.

ACCESSORIES

- Pup joints, nipples, crossovers, flow couplings.
 - Cementing jewelry, i.e. float collars, stage collars, plugs, cement heads, casing centralisers, etc.
 - Slotted and perforated tubulars and wire wrapped screens, in carbon and stainless steels.
 - Sucker rods in accordance with API 11B in a wide range of sizes, lengths and grades.
 - Drill collars and drill string accessories.
- Other specific accessory equipment can be provided upon request.

Individual customer requirements vary widely, driven by product application and to a certain extent by the origin of the product. Manufacturing plants are all unique and non-infallible. We understand the need to have fully qualified inspectors available who are familiar with the specific mill production facility being utilised, both from a technical and geographical point of view. We will ensure that all new mill production is monitored by qualified third party inspectors. The standard scope of inspection for each individual product and location can be provided upon request prior to purchase, the scope is open to revision at the request of the customer.

We are also able to provide a full scope of inspection services for materials

supplied on an ex stock basis. These range from a basic visual inspection to full UT and EMI NDT. As with the mill inspection the scope can be agreed up front prior to any purchase. Through this process of acceptance of goods prior to shipment, both parties are assured that their requirements are fully satisfied.

We operate an auditable Quality Management System in accordance with ISO 9001. The QMS is frequently audited internally by our qualified staff. All technical and commercial operations of our company are subject to the provisions of this ongoing quality system. Copies of our quality assurance manual are available upon request.

DNV BUSINESS ASSURANCE MANAGEMENT SYSTEM CERTIFICATE

Certificate No. 124441-2012-AQ-ARE-RvA

This is to certify that

Pemco Supplies Middle East

at

Suite 1201, Saba Tower 1, Jumeirah Lakes Tower Area,
Dubai, United Arab Emirates

has been found to conform to the Management System Standard:

ISO 9001:2008

This Certificate is valid for the following product or service ranges:

Trading and Supply of Oil Country Tubular Goods (OCTG)

Initial Certification date:

30th November 2006

This Certificate is valid until:

29th November 2015

The audit has been performed under the supervision of:

Vikas Thakur
Lead Auditor

Place and date:

Dubai, 06 November 2012

for the Accredited Unit:

DET NORSKE VERITAS CERTIFICATION B.V.,
THE NETHERLANDS

Shahram G. Maralani
Management Representative

Lack of fulfilment of conditions as set out in the Certification Agreement may render this Certificate invalid.

ACCREDITED UNIT DET NORSKE VERITAS CERTIFICATION B.V., ZWOLLESTRAAT 1, 2994 LB, BARENDESGOET, THE NETHERLANDS, TEL.: +31 (0) 10 2922600, WWW.DNVBA.COM

SERVICES

We provide a comprehensive OCTG stock management program tailor made to the requirements of our customers. Our personnel have vast experience in the implementation and management of stocking programs in various locations around the world.

The services that can be provided are as follows:

- Material requirement planning
- Inspection during the manufacturing process
- Delivery of material from mill to stocking location
- Customs clearance
- Reception inspection
- Storage and maintenance
- Material preparation prior to rig site
- Transport to rig site
- Collection of unused OCTG from rig site and transport back to stocking location
- Inspection of rig returns
- Repair of rig returns
- Buyback of good material
- Scrap and disposal of any rejected material

In addition to the range of services, we can also provide consignment stock whereby the customer has a continuous drilling program. The total cost of ownership will be reduced by integrating the consignment stock along with the stock management program.

On each occasion the scope of services is tailor made to the customer requirements and the geographical location.
